Chibuike Maduabuchi - Design Engineer

chibuikemaduabuchi2023@gmail.com • https://chibu.dev ↗

SUMMARY

Design Engineer working across product design and frontend engineering. I design and build React, Next.js, and TypeScript products for complex workflows, with a focus on healthcare, fintech, dashboards, forms, data-heavy interfaces, and accessible product systems. My strongest current work is MediBridge, a healthcare platform for AI-assisted patient onboarding, structured medical records, and hospital-to-hospital record transfer workflows.

EXPERIENCE

Design Engineer • Roboto Studio *August 2026 – Present*

- Build client and internal web products with Next.js, TypeScript, and Tailwind CSS, taking projects from Figma designs through implementation and production.
- Develop and maintain shared React components used across projects, covering interaction patterns and states such as focus, loading, empty, and error.
- Use Claude Code and Codex to accelerate implementation, while reviewing generated code, checking edge cases, and testing interfaces in the browser before release.
- Contribute to internal R&D on design-to-code workflows and automated UI audits.

Design Engineer • Independent Design Engineering Practice *December 2024 – August 2026*

- Designed and built web applications end to end, taking ownership of interface design, database architecture, backend development, and deployment.
- Developed full-stack applications with Next.js and Node.js, using PostgreSQL and Drizzle ORM for data management and Better Auth for authentication.
- Built complex administrative interfaces, including data tables, filtering systems, drawers, and multi-step forms.
- Implemented form validation and state management with React Hook Form, Zod, and other tools across data-heavy workflows.

Product Designer • Kulipal Technologies Limited *January 2024 - May 2025*

- Led the design of the Branch Management feature, from user interviews and workflow exploration to high-fidelity prototypes and developer handoff.
- Designed mobile and web experiences across the company's food, events, and housing products.
- Worked across product flows and interface details to translate user needs into clear, usable experiences.

EDUCATION

University of Nigeria, Nsukka • Bachelor of Engineering, Civil Engineering

Checklearn • UI/UX Design Course, Experienced Batch

SKILLS

Design

Product design | UX design | UI Engineering | Interaction Design | Design Systems | Information Architecture | Prototyping | Accessibility | Responsive Design

Engineering

React | Next.js | TypeScript | HTML | CSS | Tailwind CSS | Framer Motion | React Hook Form | Zustand | Zod | TanStack Query | SWR | Node.js | Express | PostgreSQL | Drizzle ORM | Better Auth

Tools

Figma | Paper | Codex | Claude Code
